### **DETAILED ACTION**

In response to Applicant's amendments/remarks filed 07/02/2009 of the patent application originally filed **03/06/2002**,

- Claims 1-11, 20-32 and 48 are pending.
- Claims 1 and 20 are independent claims.
- Claims 12-19 and 33-47 are canceled.
- Claims 1 and 20 are amended.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

### ***Allowable Subject Matter***

The prior art made of record:

- |                    |                   |                  |
|--------------------|-------------------|------------------|
| ➤ US 20020046235A1 | Foy, et al        | Filed 03/02/2001 |
| ➤ US 20010047326A1 | Broadbent, et al. | Filed 03/13/2001 |
| ➤ US 20070208606A1 | MACKAY, et al.    | Filed 05/03/2007 |

- ❖ Claim(s) 1-11, 20-32 and 48 are allowed:

The following is a statement of reasons for the indication of allowable subject matter:

Interpreting the claims in light of the specification, Examiner finds the claimed invention is patentably distinct from the prior art of record, which set forth in the followings:

- **Foy** teaches a system and method for creating and delivering a document in a computer system comprising a host server and a remote client terminal connected via a data transmission path, wherein the content management engine sends prompts to the user at the client terminal to guide the user through the document creation process being performed at the host server. The user is prompted to enter information regarding the nature of the required documentation which is used to identify a relevant template or set of templates. The user is further prompted to provide information 93 to enable the selection of content. This is generally discloses & Para(s) 3, 13, 32 and illustrated @ Fig 4 of Foy.
- **Broadbent** discloses the interface system for a mortgage loan originator. The compliance engine represents specific loan type associated with completing the corresponding transaction type, the document structure questions identifying a predetermined plurality of contractual provisions that the user can elect from for inclusion within the assembled document arise from compliance rules that arise out of different characteristics of the lender's loan product and regulation of a specific loan. This is generally discloses & Para(s) 178, 140, 182, 185 and illustrated @ Fig. 9 of Broadbent.

- **MACKAY** discloses workflow management such as, "GO TO DEAL HISTORY" which is shown at item 1620 in FIG. 12D [e.g., the loan level processes], See Mackay at Fig(s). 11 and 12 and at Para [0242].)

Under the broadest reasonable interpretation of the claimed limitation which is consistence with the Applicant's Specification. The prior art cited above fails to teach all of the Applicant's claimed limitation. In particularly, the claimed invention advantageously provides a finer level of detail that enables the **logic imbedded within the template** for controlling a structure of an assembled document, for **controlling** displaying document structure **questions, and for identifying input documents** used for performing document assembly such that these functions may be performed by the remote computer **without further communication with the server**. [See amended claims 1 and 20 @ Page(s) 2-3 and 5-6; also the current specification @ Para(s) 51-53 and illustrated @ Fig(s) 1, 2 and 8.]

The Examiner asserts that the claims overcome the prior art of record as describes above when the limitations are read in combination with the respective claimed limitations in their entirety.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
